PAID MEDIA PORTFOLIO

# Paid media judged on customers, not clicks.

I plan and run Google, Microsoft, Meta, LinkedIn and TikTok campaigns, judged on what the client actually gets. Agency, in-house and independent work across banking, insurance, education, e-commerce and consumer goods.

GOOGLE ADS · MICROSOFT ADS · META · LINKEDIN · TIKTOK · GA4 · SERVER-SIDE GTM

OVERVIEW

# Three operating models. One rule: follow the outcome.

Agency, regulated in-house and independent work. In each, a lead is a starting signal; the client's real outcome is the scoreboard.

HOW I'D RUN YOUR CLIENT'S ACCOUNT

## Signal first. Budget follows evidence.

**01 · Week 1**

### Audit the signal

Check tracking, CRM fields, search terms and creative, so the account learns from the right events.

**02 · Weeks 2–4**

### Agree the outcome, plan the mix

Tie KPIs to what the client needs, set channel budgets and write the first test plan.

**03 · Month 2 on**

### Test, learn, reallocate

Structured tests on audiences, offers and creative. Budget follows the evidence.

**04 · Every month**

### Report the business result

CPL stays on the dashboard; the conversation is cost per customer and what to do next.

PAN ASIA BANK · SRI LANKA · META AND GOOGLE ADS

# Follow the leads that become loans.

**THE PROBLEM**

Win borrowers in Sri Lanka's competitive gold-loan market on a fixed media budget.

**THE SIGNAL**

Meta produced higher-quality leads at a lower cost per lead than Google Ads.

**THE DECISION**

Allocate 60% Meta / 40% Google Ads on cost and lead quality, and judge every week on funded loans, not form fills.

**THE LEARNING**

Low CPL means little unless qualified leads turn into funded loans.

**CHANNEL ALLOCATION**

META · 60% | GOOGLE ADS · 40%

Meta and Google Ads

Loan value is principal lent, not bank revenue or profit. The 20:1 loan-value-to-media ratio is not ROAS.

PETMART.LK · E-COMMERCE · GOOGLE SHOPPING, PERFORMANCE MAX AND META

# Turn acquisition into repeat commerce.

### THE PROBLEM

The online pet retailer needed stronger e-commerce acquisition and more subscription customers.

### THE SIGNAL

The campaign structure did not separate prospecting from returning-customer activity, which left room to steer spend.

### THE DECISION

Restructured Google Shopping and Performance Max, and ran complementary Meta campaigns alongside.

### THE LEARNING

Acquisition is worth more when it is connected to repeat purchases.

**Launch-quarter sales**

ALSO AT KITES · GODREJ

Ran TikTok and Meta influencer campaigns with the Kites team to launch a new haircare range.

PRIVATE UNIVERSITY, SAUDI ARABIA · META LEAD FORMS

# Optimize for enrolments, not form fills.

**THE PROBLEM**

Two colleges had the lowest intakes, and broad targeting was not filling them.

**THE SIGNAL**

The cheapest campaign per lead delivered only 17 enrolments for those colleges.

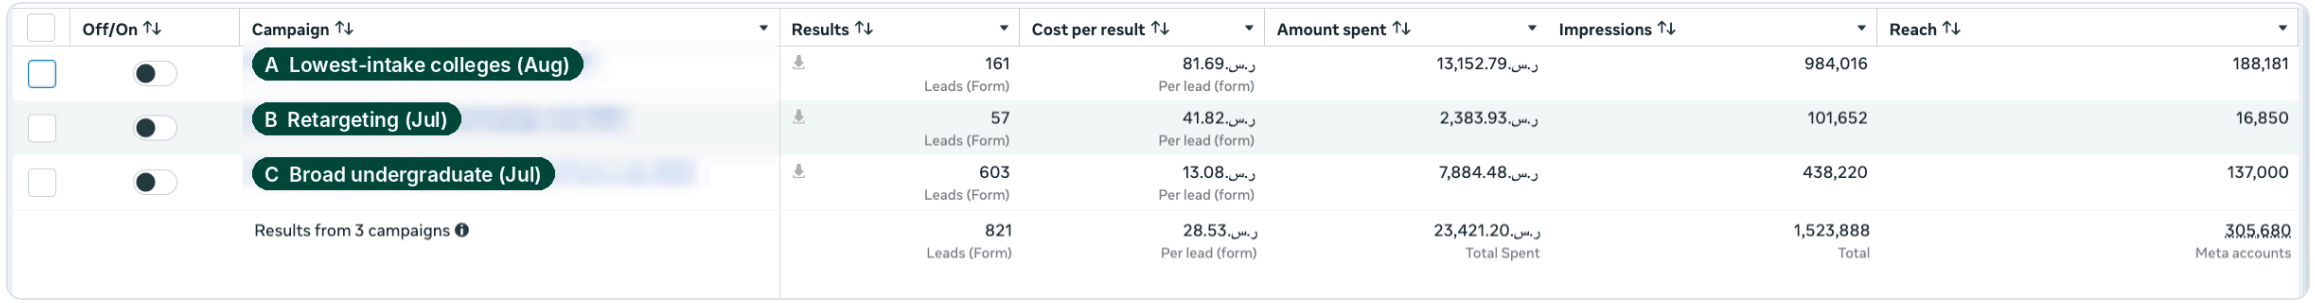

**THE DECISION**

A dedicated campaign with high-intent lead forms, its own budget and A/B-tested creative.

**THE LEARNING**

Blended CPL hides priorities. A 6x higher CPL bought the enrolments the client needed.

| Campaign | Leads | Enrolled | Lead→enrolled | Cost / lead | Cost / enrolment |
|---|---|---|---|---|---|
| Priority colleges (Aug) | 161 | 125 | 77.6% | US$21.79 | US$28.06 |

DIMO ACADEMY OF TECHNICAL STUDIES (DATS) · TRADES TRAINING · SRI LANKA

# More qualified students. Same budget.

### THE PROBLEM

DATS needed more prospects who were ready to enrol, without raising a ~US$900 monthly media budget.

### THE SIGNAL

CRM-qualified leads in Microsoft Dynamics 365, not raw form fills, showed where the funnel was leaking.

### THE DECISION

Rebuilt Google Ads and Meta lead generation, added Microsoft Advertising, and rebuilt the landing page in Lovable with a simpler lead form and an AI assistant that answers enquiries around the clock.

### THE LEARNING

Fix the traffic and the conversion path together before asking for more budget.

## SCOPE I OWN

- Bidding, budget allocation and campaign structure across **50+ business-unit ad accounts** in a seven-figure annual program. LinkedIn is the primary channel, with Google Ads and Meta.
- Moved Smart Bidding and Meta optimization from form fills to pipeline outcomes with **HubSpot offline conversions** (qualified leads, booked calls, completed applications).
- Built a **LinkedIn ABM program** for affluent-investor account openings: Matched Audiences, Thought Leader Ads, carousel creative.
- Rebuilt measurement: **GA4, server-side GTM, Enhanced Conversions, Meta CAPI**, and removed double-counted conversions from overlapping tags.
- Built an Apps Script **campaign builder** with UTMs, naming and compliance controls; set direction for two agency partners; report bi-weekly to the CMO.
