PAID MEDIA / MULTI-CLIENT

Andrew Fonseka.

Paid Media Specialist

Paid media judged on customers, not clicks. I run seven active clients across four industries alongside a seven-figure in-house program, and budget follows qualified leads, enrolments and funded accounts.

CASE STUDY 01 / EDUCATION / SAUDI PRIVATE UNIVERSITY / MAY–AUG 2026

Optimize for enrolments, not form fills.

Independent, via partner agency · Saudi Arabia · Meta lead forms · enrolments matched in the university CRM

821
META LEADS

430
QUALIFIED LEADS

312
FEE-PAID ENROLMENTS
CRM-matched: name, phone, ID

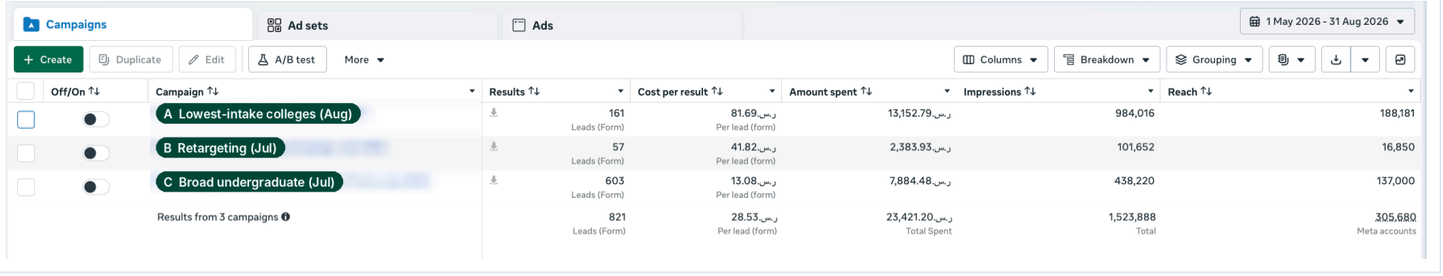

~US$20
PER ENROLMENT
~US$6.2K total spend

THE PROBLEM

Two colleges had the lowest intakes; the broad campaign delivered only 17 enrolments for them.

THE DECISION

Dedicated high-intent forms, a separate budget and A/B-tested creative for the priority colleges.

Meta Ads Manager · 1 May–31 Aug 2026 · institution identifiers removed

CASE STUDY 02 / BANKING / PAN ASIA BANK / 2023

Follow the leads that become loans.

Kites Global agency engagement · Sri Lanka · Meta and Google Ads · funded loans matched to campaign leads

THE PROBLEM

Win borrowers in a competitive gold-loan market on a fixed budget.

THE SIGNAL

Meta produced higher-quality leads at a lower CPL than Google Ads.

THE DECISION

Split 60% Meta / 40% Google; judged weekly on funded loans, not forms.

THE LEARNING

Low CPL means little until qualified leads become funded loans.

BUSINESS OUTCOMES

FASTER ENQUIRY REPLIES
AI assistant vs. manual

~US$900
MONTHLY MEDIA BUDGET

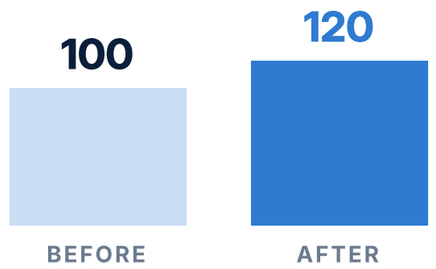

THE SIGNAL

CRM-qualified leads in Dynamics 365, not raw form fills, exposed the bottleneck.

THE DECISION

Rebuilt Google and Meta, added Microsoft Ads, simplified the landing page and form, and launched a 24/7 AI assistant.

CRM-QUALIFIED LEADS · INDEX

NOTE Client-reported, before-and-after comparison; not a controlled test.

INDEPENDENT PRACTICE / 2026

Seven clients. One operating system.

Run alongside a full-time role: different industries, the same outcome-first setup.

EDUCATION

Saudi private university · DIMO Academy

Meta, Google and Microsoft Ads optimized to CRM-matched enrolments and qualified leads.

LOCAL SERVICES

Landscaping

Google Business Profile, GA4 call tracking and after-hours AI voice booking.

HOSPITALITY

Restaurant

Klaviyo email to drive repeat visits.

EVERY CLIENT

Client reporting

Looker Studio dashboards with Supermetrics, reported on CRM outcomes rather than platform metrics.

THE SAME SETUP FOR EVERY CLIENT

Agree the outcome
Enrolment, booking, qualified lead

02
Connect the signal
GA4, call tracking, CRM match

03
Test
Audiences, offers, creative

04
Reallocate
Budget follows outcomes

NO CLIENT CONFLICTS

Active engagements transition to a partner agency when I start a full-time role.

CASE STUDY 04 / FINANCIAL SERVICES / AEGON / IN-HOUSE · U.S. & CANADA

Bid on pipeline. Trust the data.

Google Ads, Meta, HubSpot, GA4, server-side GTM · 50 owned ad accounts, ~100 co-managed · seven-figure annual program

THE PROBLEM

Smart Bidding and Meta optimized to form fills, and overlapping GTM tags double-counted conversions.

THE DECISION

Fed HubSpot stages back as offline conversions, restructured Google Ads around them, and rebuilt tracking on GA4, server-side GTM, Enhanced Conversions and Meta CAPI.

ALSO BUILT

A new LinkedIn ABM program for high-net-worth investors (H1 2026), and a team-adopted Apps Script campaign builder: **−60% compliance review time**, ~12 working days saved a year.
